

Oil trucks are nine feet wide and do not have four-wheel drive.

Winter Snow And Ice: 5 Things You Can Do

Undoubtedly, the cold weather this winter will bring our share of ice and snow. Please take the following actions to help us make sure you get your winter deliveries in a timely manner:

- 1) Clear a path to your fill pipe so that the driver can easily locate it.
- 2) When you plow your driveway, keep in mind that oil trucks are nine feet wide and do not have four-wheel drive.
- 3) If your driveway is not clear and dry, please salt and sand for the oil truck.
- 4) Trim low-hanging tree branches to accommodate an 11-foot-high oil truck.
- 5) If you want to know when you can expect your next delivery, call us at 973-383-1421.

Ultra Low Sulfur Diesel Now Available At Hart & Iliff

We are now offering premium quality Ultra Low Sulfur Diesel (ULSD) at our Newton facility at 4 Hampton Street. In addition, if you have your own diesel tank, we can make bulk deliveries to your location. Please call us for details.

Hart & Iliff Implementing GPS

Hart & Iliff is implementing GPS technology to track our service vans and oil trucks. We believe this technology will allow us to route our vehicles more effectively, thereby improving the level of service we are able to provide.

If, for example, you call for emergency service, it will allow us to look at a tracking screen and quickly determine which of our technicians is closest to your location. This type of information should allow us to provide you with faster and more efficient service.

Hart & Iliff Receives Master HVACR Contractor License

Hart & Iliff is one of the first heating, ventilating, air conditioning and refrigeration (HVACR) contractors in New Jersey to receive the new Master HVACR Contractor License. Our license (#19 HC00083800) became effective on August 22, 2014. All future HVACR work will be performed under this license number. We also anticipate that all of our technicians will receive their Master HVACR Contractor Licenses.
